1. for longer than 4 seconds at a time;
2. more often than once every 3 minutes;
3. when the vehicle is stationary;
4. except on approach to a selling point;
5. when in sight of another vehicle which is trading;
6. when within 50 metres of schools (during school hours), hospitals, and places of worship (on Sundays and other recognised day of worship);
7. more often than once every 2 hours in the same length of street;
8. louder than 80 dB(A) at 7.5 metres;*
9. as loudly in quiet areas or narrow streets as elsewhere.

It is an offence to sound your chimes at any time in a way which gives reasonable cause for annoyance.

* Noise measurements should be undertaken with a meter which conforms to BS 5969:1981 (Type 1) (Specification for sound-level meters) set to the A-frequency weighting and the S-time weighting. The microphone should be held at a height of 1.2 metres above the ground, and at a distance of 7.5 metres from the loudspeaker. The microphone should, where necessary, be fitted with a windshield and the meter should be calibrated prior to use.
