

Reference point	Estimated height mAOD	Notes
view	A1	25 G L Ferry Road at old railway bridge east of Goldenacre
	A2	28 G L Ferry Road towards west of Goldenacre
	A3	17 G L Castle and Hub spire across open ground from Eildon St is contained within the view cone, but having a lower sight line because closer to Castle so that roof levels on either side of George St are particularly significant
skyline	B	100-115 key skyline continues across the length of Old Town, roof levels rising from the east up to Hub spire
	C	90 roof levels SW of Castle; New Town roofline also critical on this alignment
backdrop	D	105 at Hub spire sky; gap in Castlehill roof levels east of Hub spire on this alignment emphasises height of tower; sightline rising, but care needed to keep this feature
	E	- low roof levels past west side of Castle on this alignment; sightline rising, but care needed to keep this feature to sustain this upstanding face of Castle against sky

**Castle and Old Town skyline from A902 Ferry Road opposite Clark Road, and Eildon Street View No. N7e**
