Choice 1 C

We want to identify areas that can be used for future water management to enable adaptation to climate change. Do you agree with this? - Yes / No

Short Response

Explanation

Choice 1 D

We want to clearly set out under what circumstances the development of poor quality or underused open space will be considered acceptable. Do you agree with this? - Yes / No

Short Response

Explanation Proposed changes to policy could be open to abuse by developers who could argue that development in such circumstances should have higher priority than open space protection. Hillhouse Road Woods (Queensferry Road) has been the subject of 4 planning applications in 4 years for a Care Home, all refused because of the strength and safeguarding in the current local development plan. Such a development would require the clearance of nearly 50% of the mature trees on the site. The developer argued that open space which is not available with public access, is underused and has little value. The local community disagrees - the trees, safeguarded with a tree preservation order, provide a positive visual and aesthetically pleasing vista on Queensferry Road, a main arterial route, contribute to minimising climate change, and assist in absorbing traffic pollution. Because the site is not available with public access, it makes a major contribution to biodiversity. Any policy changes should strengthen support for existing open space, irrespective of size. The changes should also give greater support to tree preservation orders by requiring replacement tree planting where owners seek to fell established protected trees.

Choice 1 E

We want to introduce a new 'extra-large green space standard' which recognises that as we grow communities will need access to green spaces more than 5 hectares. Do you agree with this? - Yes / No

Short Response

Explanation We agree, but it is equally important that existing open space in established communities is safeguarded and retained. If greater emphasis is to be given to new higher density housing with gardens to counter the disadvantages of flatted developments in the current coronavirus lockdown, then provision of 5 hectares could perhaps be reduced.

Choice 1 F

We want to identify specific sites for new allotments and food growing, both as part of new development sites and within open space in the urban area. Do you agree with this? - Yes / No

Short Response

Explanation There is community interest in Craigeith and Blackhall in establishing a community garden and using part of a park for allotments and other purposes. Guidance through City Plan 2030 would be helpful.

Choice 1 F

We want to identify specific sites for new allotments and food growing, both as part of new development sites and within open space in the urban area. Do you agree with this? - Upload (max size 3mb)

Choice 2 B

We want to revise our policies on density to ensure that we make best use of the limited space in our city and that sites are not under-developed. Do you agree with this? - Yes / No

Short Response

Explanation Yes - provided the overall design on a site such as the former Royal Victoria Hospital site has full regard to the character and density of existing housing adjacent to the boundary site. We assume the Place Plan will have a role in achieving this requirement. The current coronavirus pandemic has also illustrated the limitations of flatted development with no private garden space and priority should not be given solely to new flatted developments without direct outdoor space.

Choice 2 C

We want to revise our design and layout policies to achieve ensure their layouts deliver active travel and connectivity links. Do you agree with this? - Yes / No

Short Response

Explanation

Choice 2 D

We want all development, including student housing, to deliver quality open space and public realm, useable for a range of activities, including drying space, without losing densities. Do you agree with this? - Yes / No

Choice 5 A

We want City Plan 2030 to direct development to where there is existing infrastructure capacity, including education, healthcare and sustainable transport, or where potential new infrastructure will be accommodated and deliverable within the plan period. Do you agree with this? - Yes / No

Short Response

Explanation It makes sense to maximise the use of existing infrastructure, but the Choices report states that in north Edinburgh Broughton and Flora Stevenson Schools, which serve Craigleith, do not have capacity to support pupil growth. How will new schools be financed - PFI or direct City Council funding ? Will new development therefore not be permitted until new schools completed ?

Choice 5 B

We want City Plan 2030 to set out where new community facilities are needed, and that these must be well connected to active travel routes and in locations with high accessibility to good sustainable public transport services. Do you agree with this? - Yes / NO

Short Response

Explanation The Choices Report focuses on areas where there will be tram extensions (which could generate local opposition) but does not reflect other transport corridors included in the Draft City Mobility Plan, particularly corridor 10 connecting West Edinburgh with Granton area. The planning and environmental implications for Blackhall and Craigleith are not addressed and are unclear, given Queensferry Road already has severe congestion and disadvantages the existing local community.

Choice **5 E**

We want to stop using supplementary guidance and set out guidance for developer contributions within the plan, Action Programme and in non-statutory guidance. Do you agree with this? - Yes / No

Short Response

Explanation

Choice **6 A**

We want to create a new policy that assesses development against its ability to meet our targets for public transport usage and walking and cycling. These targets will vary according to the current or planned public transport services and high-quality active travel routes. Do you agree with this? - Yes / No

Short Response

Explanation Yes and no. Fine in theory but the possibility of getting covid-19 virus on, say, public transport may deter and reduce the use of buses in favour of the continued use of private cars. It may be necessary to review both the City Plan 2030 and the draft Mobility Plan in light of the current pandemic circumstances. Suggestions in the Draft Mobility Plan to curtail bus services in the city centre may also act as a disincentive to use bus services. Likewise the proposal to reduce the number of bus stops seems counter intuitive.

Choice **6 B**

We want to use Place Briefs to set the targets for trips by walking, cycling and public transport based on current and planned transit interventions. This will determine appropriate parking levels to support high use of public transport. Do you agree with this? - Yes / No

Which option do you support? - Option 1/2/3

Short Response Option 3 (Blended)

Explanation Our preference is for priority to be given to brownfield sites over green field sites, but we recognise that there could be constraints and problems in delivering some brownfield sites. Compulsory purchase orders could take time to be processed and approved, other sites are deficient in school provision eg Comely Bank brownfield group, which will need to be addressed before building development can begin. Concentrating solely on brownfield sites could lead to undeveloped land contributing to, say, other environmental priorities being seen by developers as an opportunity for development.

Choice 14 A

We want City Plan 2030 to support the best use of existing public transport infrastructure in West Edinburgh and accommodate the development of a mix of uses to support inclusive, sustainable growth. We will do this through 'an area of search' which allows a wide consideration of future uses within West Edinburgh without being tied to individual sites. Do you support this approach? - Yes / No

Short Response

Explanation Yes - provided the area of search as shown on the map has full regard to the wider traffic implications for existing major routes between West Edinburgh search area and the City. Traffic on Queensferry Road is already at capacity for lengthy parts of the day and proposals to include both bus lanes and possibly separate cycle lanes in both directions could extend the delays significantly and increase traffic pollution. The road already acts as a significant barrier within the Blackhall area and that is before major housing is completed at Cammo, South Queensferry and Kirkliston in accordance with the approved LDP - and what might emerge from West Edinburgh search. Development of West Edinburgh should include both improved and more effective public transport links along Queensferry Road, as well as measures to address the wider traffic problems.

Choice 14 B

We want to remove the safeguard in the existing plan for the Royal Highland Showground site to the south of the A8 at Norton Park and allocate the site for other uses. Do you agree with this approach? - Yes / No
