Response Type

Community Council

On behalf of:

Grange/Prestonfield Community Council

Choice 15 A

We want to continue to use the national 'town centre first' approach. City Plan 2030 will protect and enhance the city centre as the regional core of south east Scotland providing shopping, commercial leisure, and entertainment and tourism activities. Do you agree with this? - Yes / No

Short Response

No

Explanation

We are not supporting this because we think we think the policy needs further review as online shopping has accelerated due to the corona virus crisis, a trend which is not likely to revert to what it was before. Therefore there may be a need to encourage other City Centre uses offering greater diversity. This would create a better visitor experience compared with the same national and international brands seen everywhere.

Choice 15 B

New shopping and leisure development will only be allowed within our town and local centres (including any new local centres) justified by the Commercial Needs study. Outwith local centres, small scale proposals will be permitted only in areas where there is evidence of a lack of food shopping within walking distance. Do you agree? - Yes / No

Short Response

No

Explanation

We think the Commercial Needs Study needs a review having regard to the corona virus crisis which has emphasised the value of local centres but also small scale local provision within easy walking distance.

Choice 11 B

We want City Plan 2030 to require a mix of housing types and tenures – we want the plan to be prescriptive on the required mix, including the percentage requirement for family housing and support for the Private Rented Sector. Do you agree with this? - Yes / No

Short Response:

Explanation:

Choice 12 A

Which option do you support? - Option 1/2/3

Short Response:

Explanation
In supporting Option 1, there may be conflicts to be resolved between mixed use development at higher density than hitherto, possibly including employment sites where there could be environmental impacts on residents. This would have to be very firmly managed using other relevant LDP Policies. The numbers of required housing are stated as facts, but are still projections based on population movements, social changes and forecasts of economic and other activities. The supporting studies are well founded using established techniques. However it may be that the outcome of the 2021 census could produce factual data different from the assumptions made. This LDP in the August 2018 Scheme was forecast to be adopted in March 2021. In January 2020 the revised LDP Scheme forecast it to be adopted in February 2022, almost a year later. The impact of the corona crisis means a further unknown and substantial delay before the LDP can be adopted. We think it would be better now to delay adoption of City Plan 2030 until there has been time to take account of the trends shown by the March 2021 Census. This would produce a much more robust and reliable LDP which could command greater support. The present LDP would continue until the new one is ready and CEC should seek the consent of the Scottish Government if required for this change. Furthermore It is possible that the result of coming out of the current corona crisis will be lower economic activity and employment than expected for a long time. However in these circumstances the demand for affordable homes may be proportionately even greater and the need to meet this from public investment enhanced. We think we need to see what lower economic growth would look like as a further option in circumstances where there could still be a substantial need for affordable homes.

Short Response

Yes

Explanation

Choice 12 BX

Do you support or object to any of the proposed greenfield areas? (Please tick all that apply) - Explain why

Short Response

Not Answered

Explanation

A large proportion of former greenbelt and open space land in south East Edinburgh has already been lost to housing and so far the outcome has been housing of rather mediocre character resulting in poor place-making. What remains of the Green belt needs enhanced protection to ensure that it is not allowed to become further degraded thereby failing to fulfil its purpose and creating pressure to release it for development.

Choice **11 A**

We want to amend our policy to increase the provision of affordable housing requirement from 25% to 35%. Do you agree with this approach? - Yes / No

Short Response

Explanation GPCC notes that the real housing problem for Edinburgh is lack of affordable housing and the proposed change from 25% to 35% does not go far enough in addressing this demand. By definition, increasing the % just makes the rest of the market housing less affordable, without really addressing the overall problem. It distorts market housing by requiring possibly a larger provision of market housing than the market may be able to sustain at a specific time, just in order to satisfy the affordable housing requirement. The policy has failed so far and increasing the % to 35% will not make it successful. What is needed in parallel with market housing is a greatly increased provision of social housing by public authorities, housing associations and other not-for-profit organisations with innovative solutions with public investment to match.

Choice **11 B**

We want City Plan 2030 to require a mix of housing types and tenures – we want the plan to be prescriptive on the required mix, including the percentage requirement for family housing and support for the Private Rented Sector. Do you agree with this? - Yes / No

Choice **10 A**

We want to revise our policy on purpose-built student housing. We want to ensure that student housing is delivered at the right scale and in the right locations, helps create sustainable communities and looks after student's wellbeing. Do you agree with this? - Yes / No

Short Response

Explanation The GPCC area has suffered from large student housing developments resulting in a failure to encourage more mixed and diverse communities so we support the proposed changes. We think all student housing sites should include the same open space as normal housing, ensuring adaptability to future housing use. We think that the demand for large scale specialist student housing will reduce as more students engage in online study remotely with less demand for long stay student residences. Edinburgh must be ready for this change by ensuring that future student accommodation is basically tenure blind and indistinguishable from normal housing, thus facilitating change of use. we think

Choice **10 B**

We want to create a new policy framework which sets out a requirement for housing on all sites over a certain size coming forward for development. Do you agree with this? - Yes / No

Short Response

Explanation Supported but there is a risk that sites above 0.25ha may be subdivided with spurious changes of ownership to avoid this obligation. This 0.25Ha requirement is in the current Student Housing Guidance with a cut-off date for applicability and this date needs to be brought forward if this measure is to be effective.

Choice **1 A**

We want to connect our places, parks and green spaces together as part of a city-wide, regional, and national green network. We want new development to connect to, and deliver this network. Do you agree with this? - Select support / don't support

Short Response

Explanation Whilst we support this policy, an LDP can only help to bring this about through the planning process. The real challenge is how to change the existing infrastructure and built environment and this requires substantial investment and some element of compulsion. If this is not addressed by CEC the next LDP would just bring about disconnected bits of green space etc with no improvement in overall green connectivity and create a sense of failure. The current LDP although supporting green networks etc has not brought about any real improvement and we think the MIR should address why this has not happened.

Choice **1 B**

We want to change our policy to require all development (including change of use) to include green and blue infrastructure. Do you agree with this? - Support / Object

Short Response

Explanation Whilst this is obviously desirable, CEC must change its approach to planning administration and stop permitting developments with no or inadequate open and green space, such as in purpose-built student accommodation. Such a change would not only benefit the environment as a whole and local communities, but would also improve the mental well being of residents of this type of accommodation.

Choice **1 C**

We want to identify areas that can be used for future water management to enable adaptation to climate change. Do you agree with this? - Yes / No

Short Response

Explanation SUDS and related flood mitigation measures are long established procedures used to manage run-off from new developments. CEC is not the water management authority but needs to ensure through planning administration that sufficient resilience is build in to new developments to ensure reasonable protection against climate change impacts. The increasing industrialisation of sports facilities and farming and food production practices need careful consideration in open space and green belt areas to ensure that they do not encourage increased rates of run-off and a poorer environment. For instance currently the Edinburgh University Sports Village scheme (19/05923/FUL) proposes substantial areas of artificial sports pitches in the existing LDP Area of Importance for Flood Management.

Choice **1 D**

We want to clearly set out under what circumstances the development of poor quality or underused open space will be considered acceptable. Do you agree with this? - Yes / No

Short Response

Explanation Setting out the criteria clearly and following through with this is crucial, as otherwise a landowner of open space or green belt land has a powerful financial incentive to allow it to become degraded and a nuisance to encourage local support for it to be developed. Open space or green belt land should only be developed where equal of better provision of publicly accessible open space is to be provided; a developer should not be allowed to pay for a few swings in an existing park as an equal contribution.

Choice 2 A

We want all development (including change of use), through design and access statements, to demonstrate how their design will incorporate measures to tackle and adapt to climate change, their future adaptability and measures to address accessibility for people with varying needs, age and mobility issues as a key part of their layouts. - Yes / No

Short Response

Explanation In supporting this, GPCC points out that for design and access statements to be realistic and not unreasonably impinge on small developments, CEC will have to lay down criteria to be met for climate change adaptability. The corona crisis has demonstrated that working from home may increase substantially in the future as part of normal employment. Therefore other LDP policies may need to be revised to require enough spatial and amenity provision for an office or other working environment in the home, especially in flats.

Customer Ref: Response Ref:

Choice 2 B

We want to revise our policies on density to ensure that we make best use of the limited space in our city and that sites are not under-developed. Do you agree with this? - Yes / No

Short Response

Explanation Supported but GPCC notes that CEC has produced no evidence to show how recent developments exhibit under-development. Developers seek to maximise the potential of their sites, sometimes to the detriment of their surrounding communities. Therefore there should not be a substantial increase in density of a new development without any reference to the characteristics of the surrounding area. Otherwise this could create poor place-making.

Choice 2 C

We want to revise our design and layout policies to achieve ensure their layouts deliver active travel and connectivity links. Do you agree with this? - Yes / No

Short Response

Explanation In supporting active travel, this policy must not be used to force people to give up cars where public transport links are still poor and to the detriment of the ability of the aged and those with impaired mobility to get about. Walking and cycling are not options for some people and appropriate improvements in public transport must precede forcing people to give up cars. What can be achieved through an LDP is limited but trying to change our existing streets from being residential car parks to becoming more pleasant and safer places to be in must have a higher priority. How to incentivise people to give up reliance on cars is a real challenge, but better public transport is crucial.

Choice 9 A

We want to consult on designating Edinburgh, or parts of Edinburgh, as a 'Short Term Let Control Area' where planning permission will always be required for the change of use of whole properties for short-term lets. Do you agree with this approach? - Yes / No

Short Response

Explanation The current LDP has failed to control the explosion in this form of accommodation and change is needed. GPCC considers that if only parts of Edinburgh are subject to control area designation, this would just transfer the problem to areas not so subject and therefore the whole of Edinburgh should be a short term let control area.

Choice 9 B

We want to create a new policy on the loss of homes to alternative uses. This new policy will be used when planning permission is required for a change of use of residential flats and houses to short-stay commercial visitor accommodation or other uses. Do you agree with this? - Yes / No

Short Response

Explanation As well as the impact of short term lets, other uses need to be considered such as student accommodation and possibly HMOs, Whilst purpose built student accommodation can have benefits in possibly freeing up family accommodation, this is now an unregulated commercial market, escaping the requirements applicable to normal housing, creating unbalanced monolithic communities of developments unsuitable to other housing uses.

Choice **14 C**

We want City Plan 2030 to allocate the Airport's contingency runway, the "crosswinds runway" for the development of alternative uses next to the Edinburgh Gateway interchange. Do you agree with this approach? - Yes / No

Short Response

Explanation

Choice **15 A**

We want to continue to use the national 'town centre first' approach. City Plan 2030 will protect and enhance the city centre as the regional core of south east Scotland providing shopping, commercial leisure, and entertainment and tourism activities. Do you agree with this? - Yes / No

Short Response

Explanation

Choice **15 B**

New shopping and leisure development will only be allowed within our town and local centres (including any new local centres) justified by the Commercial Needs study. Outwith local centres, small scale proposals will be permitted only in areas where there is evidence of a lack of food shopping within walking distance. Do you agree? - Yes / No

Short Response No

Explanation

Choice 13 A

We want to create a new policy that provides support for social enterprises, start-ups, culture and tourism, innovation and learning, and the low carbon sector, where there is a contribution to good growth for Edinburgh. Do you agree with this? - Yes / No

Short Response No

Explanation We do not support what is proposed as we do not support all aspects of the City Centre Transformation or Tourism policies and what is proposed for the Bioquarter seems unclear. The other aspects such as start-ups, low carbon sector, innovation are not spelt out and it is unclear what the LDP would promote. Therefore we think a more nuanced and detailed approach is required.

Choice 15 A

We want to continue to use the national 'town centre first' approach. City Plan 2030 will protect and enhance the city centre as the regional core of south east Scotland providing shopping, commercial leisure, and entertainment and tourism activities. Do you agree with this? - Yes / No

Short Response

Explanation

Choice 15 B

New shopping and leisure development will only be allowed within our town and local centres (including any new local centres) justified by the Commercial Needs study. Outwith local centres, small scale proposals will be permitted only in areas where there is evidence of a lack of food shopping within walking distance. Do you agree? - Yes / No

Short Response

Explanation

Choice 15 C

We want to review our existing town and local centres including the potential for new identified centres and boundary changes where they support walking and cycling access to local services in outer areas, consistent with the outcomes of the City Mobility Plan. Do you agree? - Yes / No

Short Response

Explanation

Choice 16 A1

We want to continue to support office use at strategic office locations at Edinburgh Park/South Gyle, the International Business Gateway, Leith, the city centre, and in town and local centres. Do you agree? - Yes / No

Short Response

Explanation This policy is supported only if a further needs study is carried out to look at the likely impact on demand for office space in these locations as a result of changing work patterns accelerated by the corona virus crisis, such as working from home or in more local centres. We think the demand for large scale office blocks may diminish as employers recognise the impact and value of working from home or more locally, supported by online management, conferencing and collaboration. Even where office space is still needed, there could be less demand for large, prestigious offices in prime locations, replaced maybe by smaller facilities for prestige purposes, buttressed by the main workforce elsewhere in local centres or working from home. Instead of following the previous pattern of working, Edinburgh could lead in encouraging new forms of employment.

Choice 16 A2

We want to support office development at commercial centres as these also provide accessible locations. - Yes / No

Short Response

Explanation We doubt if the demand will be there, except as part of the new pattern of working referred to in 16A1.

Choice 16 A5

We want to continue to support office development in other accessible locations elsewhere in the urban area. Do you agree? - Do you have an office site you wish us to consider in the proposed Plan?

Short Response

Explanation

Choice 16 B

We want to identify sites and locations within Edinburgh with potential for office development. Do you agree with this? - Yes/No

Short Response

Explanation

We wish to encourage more mixed use development.

Choice 16 C

We want to introduce a loss of office policy to retain accessible office accommodation. This would not permit the redevelopment of office buildings other than for office use, unless existing office space is provided as part of denser development. This would apply across the city to recognise that office locations outwith the city centre and strategic office locations are important in meeting the needs of the mid-market. Or we could Introduce a 'loss of office' policy only in the city centre. - Yes / No

Short Response

Explanation

No view on these options. We would prefer to see more mixed use development including housing, rather than concentrating on one type of development.

Choice 15 A

We want to continue to use the national 'town centre first' approach. City Plan 2030 will protect and enhance the city centre as the regional core of south east Scotland providing shopping, commercial leisure, and entertainment and tourism activities. Do you agree with this? - Yes / No

Short Response

Explanation

Choice 15 B

New shopping and leisure development will only be allowed within our town and local centres (including any new local centres) justified by the Commercial Needs study. Outwith local centres, small scale proposals will be permitted only in areas where there is evidence of a lack of food shopping within walking distance. Do you agree? - Yes / No

Short Response

Explanation

Choice 15 C

We want to review our existing town and local centres including the potential for new identified centres and boundary changes where they support walking and cycling access to local services in outer areas, consistent with the outcomes of the City Mobility Plan. Do you agree? - Yes / No

Short Response

We want City Plan 2030 to require a mix of housing types and tenures – we want the plan to be prescriptive on the required mix, including the percentage requirement for family housing and support for the Private Rented Sector. Do you agree with this? - Yes / No

Short Response:

Explanation:

Choice 12 A

Which option do you support? - Option 1/2/3

Short Response:

Explanation
In supporting Option 1, there may be conflicts to be resolved between mixed use development at higher density than hitherto, possibly including employment sites where there could be environmental impacts on residents. This would have to be very firmly managed using other relevant LDP Policies. The numbers of required housing are stated as facts, but are still projections based on population movements, social changes and forecasts of economic and other activities. The supporting studies are well founded using established techniques. However it may be that the outcome of the 2021 census could produce factual data different from the assumptions made. This LDP in the August 2018 Scheme was forecast to be adopted in March 2021. In January 2020 the revised LDP Scheme forecast it to be adopted in February 2022, almost a year later. The impact of the corona crisis means a further unknown and substantial delay before the LDP can be adopted. We think it would be better now to delay adoption of City Plan 2030 until there has been time to take account of the trends shown by the March 2021 Census. This would produce a much more robust and reliable LDP which could command greater support. The present LDP would continue until the new one is ready and CEC should seek the consent of the Scottish Government if required for this change. Furthermore It is possible that the result of coming out of the current corona crisis will be lower economic activity and employment than expected for a long time. However in these circumstances the demand for affordable homes may be proportionately even greater and the need to meet this from public investment enhanced. We think we need to see what lower economic growth would look like as a further option in circumstances where there could still be a substantial need for affordable homes.

Explanation

Choice 15 D

We want to continue to prepare and update supplementary guidance for our town centres to adapt to changing retail patterns and trends, and ensure an appropriate balance of uses within our centres to maintain their vitality, viability and deliver good placemaking. Instead we could stop using supplementary guidance for town centres and set out guidance within the plan. Which approach do you support? - Yes / No

Short Response

Explanation

Choice 15 E

We want to support new hotel provision in local, town, commercial centres and other locations with good public transport access throughout Edinburgh. Do you agree with this approach? - Yes / No

Choice 16 A5

We want to continue to support office development in other accessible locations elsewhere in the urban area. Do you agree? - Do you have an office site you wish us to consider in the proposed Plan?

Short Response

Explanation

Choice 16 B

We want to identify sites and locations within Edinburgh with potential for office development. Do you agree with this? - Yes/No

Short Response

Explanation

Choice 16 C

We want to introduce a loss of office policy to retain accessible office accommodation. This would not permit the redevelopment of office buildings other than for office use, unless existing office space is provided as part of denser development. This would apply across the city to recognise that office locations outwith the city centre and strategic office locations are important in meeting the needs of the mid-market. Or we could Introduce a 'loss of office' policy only in the city centre. - Yes / No

Cc: [Steve Burgess](#); [Cameron Rose](#); [Ian Perry](#); [Alison Dickie](#)
Subject: Grange/Prestonfield Community Council (GPCC) - Submission on Choices for City Plan 2030
Date: 28 April 2020 16:34:24

Hello,

(i) Introduction: GPCC has submitted separately via the consultation hub responses to the “Choices for City Plan 2030” document. During the corona virus shutdown GPCC has continued online and at its online meeting on 15th April 2020, it was agreed that we would also send an email summarising our comments and drawing attention to some further points as set out below. The summary of GPCC responses follows as Appendix A to this email.

(ii) Overview: “Choices for City Plan 2030” and the buttressing studies form the Main Issues Report (MIR) for the next Local Development Plan (LDP) to 2030. Important though all that is, that is all it is. Close focus responses are required to close focus questions, but we must not lose sight of the big practicalities. The MIR and LDP to come are linked to the City Council’s four strategic objectives, but cannot fulfill these ambitious aims alone. Unless there is a City Council-led detailed programme for implementation and financing, expectations will be raised which cannot possibly be met.

The built environment and infrastructure of 2030 Edinburgh are mostly already here. New development in the LDP period, even if the market is buoyant, will still be a relatively small part of the whole. So how to bring about and pay for necessary change and improvement to existing private and public built assets and the spaces around them are equally important and difficult challenges.

Whilst we support many of the preferred options in the “Choices” documentation, we have significant caveats and comments, which the consultation hub process rather inhibits. It is structured around the CEC preferred option or other limited choices, whereas we would have preferred more encouragement for other ideas or approaches. This email, in summarising in Appendix A the GPCC responses to the “Choices” questionnaire, is intended to show where we differ or have further comments.

New challenges in spring 2020 came upon all of us with the corona virus shutdown and related impacts. Some lessons could perhaps already be learned to inform City Plan 2030 and a similar crisis could happen again. Section (iv) below sets out a few thoughts.

(iii) LDP Scheme: Population movements and changes described in the MIR documents are based on projections from 2011 census data and a lot depends on the accuracy of these forecasts for a relevant MIR and the subsequent LDP “City Plan 2030”. In January 2020 a revised LDP Scheme forecast the adoption of City Plan 2030 in February 2022, whereas the August 2018 Scheme forecast LDP adoption in March 2021, so there has already been a drift of almost a year in projected LDP adoption. The January 2020 Scheme is a tight timetable with no allowance for any further delays of any sort.

(iv) Resetting the date of LDP Adoption: The corona virus crisis could impose a further

substantial delay of unknown duration in the adoption of City Plan 2030. We think it would be better to decide now to delay the adoption of the new LDP until there has been time to absorb preliminary results from the March 2021 census, so as to be able to test the assumptions for the new LDP.

We think a further delay such as this need not be excessive, but could also have other benefits, allowing time for consideration of other LDP scenarios possibly arising from the corona virus crisis, such as lower or zero economic growth, accelerating retail changes, the impact on office and workplace spatial demand from changing work patterns and necessary changes to spatial and environmental criteria in homes to reflect working from home. If fewer students come from elsewhere to study here in face-to-face tuition throughout their course, will we need so much purpose-built student accommodation? How many tourists will come here, seeking what of our culture, heritage and space? We could maybe look at not just carbon neutrality, but reducing carbon consumption further, recognising the value of embedded carbon in the existing building stock and taking that fully into account in the carbon balance sheet.

Tony Harris

On Behalf of GPCC

Appendix A: Summary of GPCC Responses to Choices Documentation (Numbering as "Choices")

1. Sustainable, active and connected City:
 - 1A Connected Green Spaces: Agreed, but how to connect spaces in new development through the existing infrastructure?
 - 1B All development to include Green and Blue infrastructure: Agreed, but CEC has to enforce its own guidance.
 - 1C Water Management & Climate Change: Supported but see detailed response to 1C.
 - 1D Development of Open Space: Only where equal or better provision nearby is made.
 - 1E Extra-large green space standard: Not supported – smaller spaces more realisable & more of them needed.
 - 1F New allotments: Agreed, but additional to and not instead of new public open spaces.
 - 1G Additional cemetery provision with green and woodland burials: Supported, using also closed cemeteries where possible.
 - 1H Management Arrangements: Not supported as not clear what is proposed.

2. Quality & Density of Development:
 - 2A Adaptability to climate change and accessibility: Agreed.
 - 2B Sites not to be under-developed: Agreed but no evidence that sites have been under-developed.
 - 2C Active Travel: Agreed, but public transport improvements must precede forcing people to

- reduce car usage.
- 2D Open Space in developments: Agreed including student accommodation.
3. Delivering Carbon Neutral Buildings: Agreed, but derogation may be needed for Listed Buildings.
 4. Place Briefs & Local Place Plans: Supported, with adequately resourced community councils leading.
 5. Delivering Community Infrastructure:
 - 5A Development to be where infrastructure already exists: Supported but Tram 3 route needs greater priority and detailed re-assessment, having regard to the Strategic Sustainable Transport Study SE Corridor.
 - 5B City Plan 2030 to state where community facilities needed: Agreed, but needed at the same time as development, not after.
 - 5C Services to be located to suit walking: Agreed, but some workplaces cannot be where people live.
 - 5D1 Developer contributions: Agreed, but how will this be different from now?
 - 5D2 Cumulative Contribution Zones: Not supported as too complicated and unworkable.
 - 5E Stop using supplementary guidance: not supported as the LDP etc cannot set it all out in detail.
 6. Creating Places for people, not cars: New development to include targets for public transport usage,
 - walking and cycling: Agreed, but must be judged against public transport availability, not future aim.
 7. Supporting reduction in car use: Generally in agreement but see detailed response to 7A-C.
 8. Delivering new walking and cycle routes: Supported, but public investment needed to create routes.
 9. Protecting against loss of homes to other uses: Supported.
 - 10 Ensuring better use of land: GPCC supports better control of student housing and short term lets etc,
 - agreeing that sites should include normal housing. See detailed responses to 10A-C including retail.
 - 11 Delivering more affordable homes: Increase of affordable % from 25 to 35 not supported as will make little difference, likely to make market housing less affordable. Public investment in housing needed.
 - 12 Building new homes and infrastructure: Option 1 supported; no more loss of green belt

and open

space in SE Edinburgh. Adoption of LDP City Plan 2030 to be postponed to take account of 2021

census and corona virus impacts. See (iii) & (iv) of this email and detailed response to 12A.

13 Supporting inclusive growth, innovation, universities & culture: Not supported as too woolly, more

nuanced approach needed, including looking at impacts on universities of changes in pattern of

study, fewer residential students and effects of corona virus, including on tourism.

14 Delivering West Edinburgh: No GPCC response as outside our area, with insufficient knowledge

of the issues.

15 Protecting our city centre, town and local centres:

15A City Centre first: Not supported as policy needs review to take into account accelerating retail

changes, encouraging more diversity of City Centre uses.

15B Commercial development only to be where supported by the Commercial Needs Study:

Not supported as we think this Study needs review.

15C Town and Local Centres : Support these including improving access to them.

15D Use of Supplementary Guidance for Town Centres: Supported.

15E New hotel provision in local town centres: Supported provided up-market encouraged not

more budget provision.

15F Reducing retail floor space in favour of other uses: Supported.

16 Delivering Office, Business and Industrial Spaces: Mixed views - See detailed responses to Parts 1 & 2.
