

Integrated Impact Assessment Statement

Increase in Garden Waste Charge based on full-cost recovery (full year effect)

An integrated impact assessment was carried out on the potential impacts arising from the increase in Garden Waste charges which were approved for financial year 2021/22. As the period covered by Garden Waste charges spans two financial years, the full year effect is noted in the budget submission for 2022/23. No new impacts have been identified since the original assessment was completed.
