

## Contingency Learning <br> Primary 5 Week 6

| Reading <br> Read daily for 20 mins. <br> Write about your favourite author. Explain what it is that you like about them. Is it the genre they choose, their style or choice of language? | Numeracy and Mathematics <br> Pick 2 times tables that you find difficult. Count through the stations out loud to someone at home. For example: The 9 times table $9,18,27,36,45,54,63,72,81,90,99,108$ | Health and Wellbeing <br> Think about your home learning during lockdown and since then. What have been the challenges? What have you learned about yourself? Write out three things that help you focus and three that don't. How can you reduce the three that don't help? |
| :---: | :---: | :---: |
| Writing Instructions <br> Write instructions to teach someone how to do something. It could be bake a cake, sort a puncture or wash their hands properly. Make sure you include a list of what they will need and use bossy verbs in instructions. Check you haven't missed anything out. | Numeracy and Mathematics Partitioning <br> Using partitioning, complete the addition sums in the Worksheet attached. There are 3 different levels, choose the one that suits you. There is an example to show you how to lay out your work. | STEM <br> Explore the Moon and design a part of an astronaut's <br> Moon Camp: https://mooncampchallenge.org/moon-camp-discovery/ <br> Submit your design to receive a certificate of participation! |
| Spelling <br> Make a list of words you often struggle to spell. Think of all the different things you have done in the past to help you learn words. Use the one you think works the best to learn these. You might use a few different strategies to make sure. See how many you know by Friday. | Numeracy and Mathematics <br> Choosing the correct task for you, complete the column subtraction sums. Remember to always start from the units. If you do not have enough - Units for example, you can borrow from the Tens column. $\begin{gathered} 416 \\ 2356 \\ -1237 \\ \hline \mathbf{1 1 1 9} \\ \hline \end{gathered}$ <br> I borrowed from the tens column so that I now have 16 units takeaway 7 units. Then I was left with 4 tens takeaway 1 ten. | Expressive Arts <br> Follow the stages of the moon over the week by taking a photo (if possible!) Recreate the stages using the below activity: <br> https://www.adabofgluewilldo.com/foil-printed-moon-craft/ <br> Try sticking to a background to see the moon's progression. |
| Similes <br> Similes - What are similes? Why do we use them in speech and writing? How do you compose your own? Complete the similes worksheet to practise and apply this skill. | Numeracy and Mathematics <br> Choose 4 of your favourite tv shows. Can you work out how many minutes each one is on for? If you watched them one after another, how long would you be watching tv in total? | Social Studies <br> Time travel backwards (or forwards) to a time in history. Write your present-day self a postcard and explain how life is different. If you have gone back in time, research a particular event or place to give you extra detail to include in your postcard. |

## Similes

A simile is a figure of speech that directly compares two different things. The simile is usually in a phrase with the words "as" or "like." Using similes in our writing helps to create greater description and imagery, both of which help to engage the reader.

Here are some examples of similes...
As flat as a pancake The place was like a ghost town
As free as a bird Life is like a box of chocolates

As clear as mud The sun was like a burning light bulb
As quiet as a mouse Soaring like an eagle
As cold as ice

Look at the phrases below. Have a go at completing the phrases to make them interesting similes.

The moon glowed like . . . . .

Raindrops dripped down the window pane like . . . . .

The air smells as fresh as . . . . . .

The rose petals are as delicate $\underline{\text { as } . . . . . ~ . ~}$

The surface of the water is as smooth as . . . . . .

The icicles pointed downwards like . . . . . .

Dewdrops glistened on the flowers like . . . . . .

The clouds are as fluffy as . . . . . .

The girl sang as sweetly as . . . . . .

The traffic moved as slowly as. . . . . .

Have a go at making up your own similes, using 'like' or 'as'

## Numeracy and Mathematics - Crazy Calculator

This activity will develop your skills in solving a mathematical puzzle. You will use the image below of a broken calculator to play a game for two players.

- Write down the numbers $1-20$.
- Take it in turns to select one of the numbers and see if you can make the number using only the number and symbol keys that are left on the broken calculator. For example, 8-4-2=2 or 8-3x2=2.
- You score a point for each number that you can make.
- You could play this game again by changing the numbers and symbols left on the broken calculator, and then try to make the numbers 1-20 again.
- To make this activity more challenging, choose only two numbers and two symbols for the calculator, what numbers can you make now?

Teaching and Learning

## Thinking and Talking about My Learning - P3 \& P4 \& P5

Thinking about how you learn can help you learn more effectively.
At the end of a day of learning you might like to choose a row ( A or B ) and roll a die to select 2 or 3 questions to think about.

You can think about them by yourself or, even better, discuss them with someone else.

|  | 1 | 2 | 3 | 4 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| A | Were there any tasks today that I found too easy? <br> Why? <br> Could I have added my own challenge? | Did I make a good guess about how long each task would take? | Did I get stuck? <br> Did I give up or try a different way? <br> What did I try? | Did I try going back to a tricky task later? <br> Did that make a difference? | Did I find it easy to stay on task today? <br> What helped? <br> What didn't help? | How can I make sure I remember what I learned? |
| B | Which tasks were practice of something I already know? | Which tasks had new learning in them? <br> What did I learn? | Were there any tasks today that I found too difficult? <br> What made it difficult? <br> Did I give up straight away or keep trying? | Did any of yesterday's tasks make more sense today now that my brain has had time away from it? | Did I choose the order of my tasks? <br> Did I start with the easiest task, or the hardest, or the most interesting or the most fun? | Can I think of ways to improve my motivation for tomorrow? |
