

TRANSFORMING HISTORIC BIN LOCATIONS INTO PARKING SPACES

STATEMENT OF REASONS – TRO/23/26

Within the Extended Area Controlled Parking Zones, historic on-street bin locations are being replaced by the new Communal Bin hubs. These historic on-street bin locations currently have waiting and loading restrictions. Once the old containers are removed, these restrictions will not be required.

Therefore, the waiting and loading restrictions present on these historic bin locations are proposed to change into Permit Holders Bays, Shared Use Parking Bays or Disabled Persons' Parking Places Bays as per adjacent bays, which will increase the number of available on-street parking bays and reduce street furniture on the pavement.
