

**TRO/23/32 Statement of Reasons:**

A number of amendments have been identified as being required to ensure the effective and efficient working of the new zones being implemented as part of the Strategic Review of Parking. These amendments will help to ensure that restrictions are consistent across the new zones, and that permit eligibility within the governing Traffic Order enables those who are entitled to permits to apply for them. The amendments also add parking places and other restrictions to newly constructed and adopted roads within the Controlled Parking Zones, which again ensures a consistency of parking management.
