

EDI427 - Full Transcripts

Main Film

AIMEE

I signed up with Multiply because the thought of numbers in the past has always, like, installed massive fear in me. It would make me freeze.

KELLY

My main goal is to become a qualified social worker and it's been a goal of mine for a very long time and maths was always the barrier to that.

ROLAND

I was working in Motherwell as a fitting operating engineer. So the Multiply numeracy class that I joined is going to help me gain a better job and also to move ahead.

ASHLEY

I've just graduated for Applied Animal Science. I learned about Multiply through my brother. It helped me with my basic skills in numeracy and now it's helping me with my scientific skills as I progress.

AIMEE

My children, specifically my daughter; at school, she would shut down in maths. I did Maths On Toast with Multiply. It was aimed to do with your children, so we would do the activities that we did at Maths On Toast and Multiply at home, She enjoys maths now. She's in first year and maths is her new favourite subject.

KELLY

I applied for the Multiply Numeracy course, and within that, I also applied for the Anxiety Multiply course. It taught me, you know, how to deal with my anxieties, how to look at maths in a different way, Doing the Anxiety course actually prepared me for doing the Maths course, which was really good.

ASHLEY

I've gained multiple skills through Multiply, but the biggest one for me would be confidence; I lacked it so much at the beginning. I've managed to gain a lot of confidence in asking for help which is something I would never have been able to do before.

ROLAND

I'm assisting in teaching the boys who don't understand English I've been assisting them as a volunteer. I don't have a training qualification as a teacher. This Numeracy National level 5 course that I'm doing will help me gain a teacher's qualification.

KELLY

It was really helpful for me because it was a night class, so it enabled me to still go to work every day. The tutors are great. It wasn't overwhelming, you know; they work at your pace.

AIMEE

I was worried because there's so much statistics and numbers related to a psychology degree, that I did have a lot of anxiety. Whereas now that's completely gone, which is like the world's weight is off me.

KELLY

By the end of it, I actually really enjoy maths. I enjoy the workings of it, I enjoy being able to apply that.

AIMEE

If you're thinking about signing up to the Multiply course, I say go for it.

ASHLEY

There's no losing in this situation. It can only help you with skills and confidence and it'll help you progress. I will be hopefully moving into veterinary courses.

ROLAND

I will be able to gain a proper certificate in becoming a trained teacher.

AIMEE

There's so much more that could come next. I'm just going to continue on with my psychology degree and push for a career in education.

KELLY

It's time to move on and take that next step.
