

Professional Services Expenditure 2023/24

The purchase of professional services is governed by relevant procurement legislation and Council Contract Standing Orders (CSOs). CSOs were approved by Council on 22 June 2023.

Professional services are purchased externally where Council staff cannot provide the service, either due to a requirement for specialist expertise or to service capacity constraints.

A review of Council Contract Standing Orders of 27th June 2019 defined consultants providing professional services as specialists “who charge a fee for providing advice or services such as, but not limited to business or project management, human resources, environment, communication, information technology, property and estates and financial services”.

The definition excludes: agency, secondments and temporary workers; professional services provided by solicitors, counsel and actuaries; and technical or specialist services required for works contracts or proposed works contracts such as quantity surveyors, cost consultants, design engineers and architects.

The exclusion of the appointment of technical or specialist services required for works contracts or proposed works contracts from the consultancy services definition was to mitigate against the risk of a procurement delay leading to a delay in the progression of works contracts. It was noted that the reporting of such expenditure would continue.

On 29 October 2020, Finance and Resources Committee approved the award of a multi-lot framework agreement for the provision of Professional Services to support the Council’s technical services in delivering construction, maintenance and repair programmes. The framework consisted of 12 Lots with an estimated value to the Council of £95 million over a maximum four-year term.

On 9 December 2021, Finance and Resources Committee approved the award of a multiple supplier Clerk of Works Framework at a total estimated value of £3m.

The reported expenditure includes payments to a supplier exceeding £2,500 across all Council services.

The table below provides a summary of expenditure.

2023/24	Revenue Expenditure	Capital Investment Programme
	£	£
Professional Services Framework	4,005,593	17,224,220
Other Specialist Service providers	2,820,724	3,753,857
