

CBR Phase 6 – Proposed service

This document includes the recommended service for all 152 streets within the New Town, West End and other areas within the World Heritage Site which form Phase 6 of the Communal Bin Review.

Communal service: This means bins are located on the street (or nearby street) for residents from multiple properties to use to dispose of their waste and recycling.

Gull Proof Sacks (GPS): This means residents are provided with reusable sacks for non-recyclable waste and dry mixed recycling, food caddies and a plastic box for glass recycling, small electronics and batteries. These are kept by residents and presented for collection on specific days.
